Education

PhD Economics, University of Oxford & Nuffield College (M.Phil / D.Phil) 2022 – 2027 (Expected)
Fields: Macroeconomics, Spatial, Finance, and International Economics

BSc Economics, Pontifícia Universidade Católica do Rio de Janeiro (PUC-Rio) 2016 – 2020
with minor in Mathematics

Research Papers & Book Chapters

[Work in Progress] **Banking Fragmentation and Monetary Policy Transmission in a Currency Union**,
with Rustam Jamilov and Alexander Haas

- We study how fragmentation in European deposit insurance architectures affects credit allocation and monetary policy transmission, leveraging granular loan-level data from the ECB.
- We develop an open-economy heterogeneous financial intermediaries model to analyse spillovers from sovereign-debt exposure via bank balance sheets.

[Work in Progress] **Green Transition in Housing Markets and Optimal Policy**

- I study heterogeneous returns to energy-saving technologies across locations and property types in the UK using administrative data from Energy Performance Certificates, the National Energy Efficiency Data framework, and the ECO programme.
- I develop a quantitative spatial equilibrium model to derive optimal subsidy design for the green transition in housing markets.

[Published] **Monitoring Technology: The Impact of Body-Worn Cameras on Citizen-Police Interactions**,
with Thiemo Fetzer, Pedro CL Souza, and Caterina Soto-Vieira
Review of Economics and Statistics, 2025

[Published] **Can Trust be Built Through Citizen Monitoring of Police Activity?**,
with Thiemo Fetzer, Pedro CL Souza, and Caterina Soto-Vieira
In: *Crime, Insecurity, and Community Policing: Experiments on Building Trust*, Cambridge UP, 2024

Professional Experience

Bank of England, PhD Intern, Monetary Policy Strategy Division Summer 2026
Inter American Development Bank (IADB), Consultant Winter, 2025

- Developed NLP data processing pipelines in Python to inform systematic literature reviews that supported the IADB 2025 Agricultural Flagship Study.
- Co-authored an IADB Working Paper “[Revolving Funds Impact Evaluation: Evidence from Argentine Dairy Farmers](#)” (available in Spanish).

University of Warwick & Queen Mary, Pre-Doctoral Research Fellow Summer, 2021 – Summer, 2022

- Conducted academic research in collaboration with [Prof. Pedro Souza](#) and [Prof. Thiemo Fetzner](#) on the areas of network and spatial econometrics, and development economics.
- Wrote econometrics package [recoverNetwork](#) in R for paper "[Identifying Network Ties from Panel Data: Theory and an Application to Tax Competition](#)" from de Paula, Rasul and Souza (2024).
- Conducted econometric analysis of a field experiment to investigate the effects of police body-worn cameras on police-citizen interactions in the south of Brazil ([Barbosa et al., 2025](#)).

DataZoom PUC-Rio, Lead Software Developer

Winter, 2020 – Spring, 2021

- Designed and developed data pipelines and packages ([datazoom.amazonia](#)) in R and STATA to facilitate access to Brazilian microdata to researchers, governments, and companies.
- Structured version control (Git) and programming courses for junior developers in order to ensure codebase consistency and ease maintenance.

Climate Policy Initiative, Brazil, Data Analyst

2019

- Supported academic research in the paper "[The Effects of Transportation Infrastructure on Deforestation in the Amazon: A General Equilibrium Approach](#)" by Araújo, Assunção e Bragança (2023). This involved analyzing satellite data to understand deforestation patterns and estimating general equilibrium spatial and trade models in Python.

Teaching & Service

Organiser, Macroeconomics Reading Group, University of Oxford

Spring 2025 – Present

Organiser, Environmental Economics Seminar, University of Oxford

Spring 2025 – Present

Graduate TA Microeconomic Theory, M.Sc. Economics for Development, Oxford

Fall 2025

Undergraduate TA, 2nd Year Microeconomic Theory (Core), Christ Church College, Oxford

Fall 2025

Undergraduate TA, 3rd Year Environmental & Resource Economics, Oxford

Spring 2026

Undergraduate Political Economy; 2nd Year Micro; 1st Year Macro, PUC-Rio

2016 – 2020

Skills, Data Experience, and References

Programming: R ([recoverNetwork](#); [datazoom.amazonia](#)), Python, MatLab, STATA, Julia.

Econometric Methods: DSGE estimation (Bayesian & GMM), local projections, high-frequency identification, panel data methods, spatial econometrics, network econometrics, causal inference (RCT, IV, DiD, RDD).

Data Experience: ECB loan-level microdata, UK housing transaction data, Brazilian administrative microdata, satellite/remote sensing data, survey design and implementation.

Languages: Portuguese (Native), English (Fluent), Spanish (Advanced Intermediate), French (Basic).

Citizenship: Brazilian & Portuguese
